CORE TO CLOUD™

FULLY MANAGED SERVICE

CRISIS SIM

MAKE SECURITY POSSIBLE

Core to Cloud's Crisis Simulation service helps organisations test and strengthen their cyber readiness through real-world, interactive scenarios. Designed to bring departments together under simulated pressure, our simulations reveal gaps, spark critical thinking, and leave your team better prepared for real-world threats.

TODAY'S RISKS AND CHALLENGES

Cyberattacks are no longer a matter of "if" but "when."

Despite 82% of board members ranking cybersecurity as a top priority, only 1 in 5 organisations have a formal incident response plan. With rising threats such as ransomware, DDoS attacks, and supply chain compromises, the need for preparation across departments, not just IT, is more vital than ever.

Without clear processes, cross-functional training, and practice under pressure, even the best technical defences can fail. Crisis Simulations bring everyone - from IT to Legal to Exec teams - into the response plan.

SIMULATE. TEST. IMPROVE.

Our simulations help your organisation build confidence, sharpen coordination, and make smarter decisions when the stakes are high.

HIGHLIGHTS

- Real-world, scenario-based simulations.
- Cross-departmental collaboration under pressure.
- Identify gaps in communication and decision-making.
- Tailored insights into strengths and weaknesses.
- Fully facilitated sessions – remote or in person.
- Practical preparation for audit, regulatory, and legal risks.
- Strategic post-simulation recommendations.

READY TO TURN YOUR CYBER FEAR INTO CYBER CONFIDENCE?

Get in touch and quickly find out how you can achieve a cyber posture every IT team dreams of.

CORE TO CLOUD™

WHAT WE PROVIDE

- Custom-designed simulations based on your environment.
- Expert facilitation and moderation.
- Pre-simulation briefings and tailored content.
- Full debrief with reports, benchmarking, and improvement actions.
- Option for cross-functional simulations involving IT, Finance, Legal, Comms, and Execs.
- Focus on outcome-based learning and response maturity.

DON'T GET LEFT BEHIND

The cost of not having adequate cyber security is far too big to ignore

Your Reputation
Reputation and job security are at risk if vendor threats go undetected.

Company Reputation
Damage to customer trust and brand credibility from third-party breaches.

Regulations
Non-compliance with GDPR or ISO standards can result in legal, regulatory and financial penalties.

Impact
Severe disruption from undetected supplier risks with long-term business consequences.

HOW IT WORKS

We work with you to define the scenario, align it to your real-world risks, and build a tailored simulation. On the day, we guide your team through the crisis, observing decisions, timing, and communication. After the event, we deliver detailed findings and recommendations to improve future readiness.

SIMULATIONS WE'VE RECENTLY DELIVERED

Cybersecurity & Technical Response
- Ransomware Attack – Pay or Recover?
- Phishing Compromise – Credential Theft
- Network Takeover – Hijacked Infrastructure
- Widespread Credential Theft – Supply Chain Risk

Insider Threat & Data Breach
- Insider Data Breach – Malicious or Accidental?
- Sensitive Data Exposure – Customer/Financial Data
- IT Infrastructure Exploitation – Hidden Vulnerability

Financial, Reputational & Compliance
- Corporate Insolvency – Financial Crisis Recovery
- Marketing Data Breach – GDPR Violation
- Healthcare Data Leak – Patient Record Exposure

Operational & Supply Chain Crisis
- Public Health Infrastructure Attack
- Manufacturing Network Takeover (ICS/OT)
- Critical Supplier Collapse – Continuity Risk

Executive & Strategic Simulations
- Multi-Layered Crisis Simulation
- Board-Level Regulatory Investigation Simulation
