

# STRATEGIC CONSULTANCY

Transform your business with support from the experts.

## WHAT WE DO.

Stripe OLT's transformative consultancy services provide you with the strategic oversight, operational planning and board level advice of a Chief Technical Officer, without the commitment and expense of hiring a full time senior executive.

Offering you an incomparable advantage, our experts will help you to prioritise projects according to your budget and their likely return on investment and to establish plans for the short and medium term.

Crucially we will work alongside you, in partnership, integrating with your planning and strategy timetable, supporting your team when required.

## WHO IS IT FOR?

Even with an in-house IT department, it can be difficult for your business to keep up with the rapid developments in technology, especially when dealing with day to day requirements. That's why our strategic consultancy is vital for any business with a goal for long-term success.

## KEY BENEFITS

### One to one strategic sessions

Through working personally alongside your team, our dedicated experts strategically plan a comprehensive technical solution that focuses purely on building your business roadmap, whilst aligning with your company goals.

### Planned expenditure

Our experts will highlight areas of unnecessary expenditure to ensure that you have a tailored, cost-effective solution for your individual business requirements, with all costs planned upfront and managed effectively.

### Reduced internal resources

We work pro-actively, not reactively. This means we'll be saving you valuable time, whilst reducing the need for internal resourcing. We take a full-system view on your behalf, monitoring trends to pinpoint any potential issues before they have a chance to arise.

### Increased operational efficiency

Our industry-leading experts utilise an across-the-board understanding of your business in order to clearly define your organisation's project goals.

We will listen closely to your business requirements to create a holistic solution that completes every goal with optimal efficiency.

### Access to cutting-edge technology

As a Microsoft Gold Partner, we ensure that we stay at the forefront of technology and partner with industry leaders, to equip you with the latest innovations best suited to your needs.

## HOW DOES IT WORK?

Our team of highly qualified senior consultants will work diligently alongside your leadership and in-house teams, in order to identify your business goals and devise tailored technology projects to achieve your objectives.

### Full Audit

We begin by auditing the necessary systems, to understand your current IT policies and processes, whilst additionally providing a comprehensive overview of your existing business technology.

### Risk Mitigation

We then highlight any risks to your business that should be mitigated and recommend any further areas of improvement, be it through the adoption of new, innovative technologies or internal process changes.

### Strategic Guidance

Once your IT strategy has been defined, any required projects will be prioritised based on budget and the return on investment. This is done in order to develop plans for both the short and medium term.

### Complete Visibility

Throughout our engagement we provide a trackable risk register and fully documented audit, to make sure both parties have complete visibility.

We underpin our support with a high-level understanding of current and emerging technologies and with over 10 years' experience, working across a wide range of technology projects and sectors, we are confident in our ability to provide solutions that we know will help strengthen your business and allow it to grow.

## WHAT DOES IT COST?

As an award winning MSP, we know there is no 'one-size-fits' all solution when it comes to business technology, that's why we offer a free discovery session with our experts, to ensure we have an over-arching understanding of each project and business requirement.

## ADDITIONAL SUPPORT SERVICES

### Office Moves

Whether you're downsizing your office, adopting a flexible working structure or require larger premises, without a well-defined relocation strategy, the process of moving office can quickly become overly disruptive, adversely affecting productivity, staff engagement and even profitability.

### Back Up & Disaster Recovery

Whilst restoring and protecting data undoubtedly go hand in hand, disaster recovery is about far more than just backup. Not only are there now ever-present cyber-threats growing in complexity each day, it is also important to recognise that data loss can be additionally caused by human error, hardware failure or natural disasters.

### Device as a Service

If you need new hardware to support your new tech-first workplace, you can eliminate high upfront costs by breaking down your device purchasing into smaller, regular monthly payments with our DaaS solution.
